H i s t o r y o f o u r C o m p a n y

The Company was founded in the year of 1890 by my great grandfather who's name was Jan. The company went from "father to son" so I, Erik am now the fourth generation in charge of the Company. In the beginning it was an "ordinary Boskoop Nurseries" growing many varieties of shrubs, conifers, Rhododendron, Azalea and... since the beginning roses. The Company was exporting the crop to The United Kingdom, Sweden, Germany and also Canada was a big customer, especially for roses.

JAN SPEK ROZEN B.V.
SINCE 1890

When time passed by the rose became more and more an important item for the company especially working on new rose varieties including rose-under stock. During professional rose shows since 1913 (!) also with new varieties already, the Jan Spek Company became more and more well known as the Rose Specialist. This in a time that there were no laws regarding the protection of the roses. A large stock of the new rose-varieties were grown by the owner of the new variety where after the propagating-material was sold at a high price as possible.

Then of course after that everybody could grow the rose. That changed when the Plant Breeders Rights law came into force in 1948 and it became possible to receive Breeders Rights and the owner could ask for a "royalty" for his breeding work.

Being one of the very few companies who had been working (and loving it) with new roses like testing and introducing roses many International wellkown rose breeders contacted Jan Spek in order to represent them in the Netherlands where there was a good market for growing and selling roses. (Garden)roses were tested from famous breeders like McGredy, Dickson, Poulsen, Lens, some British breeders and from the famous Jackson & Perk-

ins from the United States.

As mentioned these were all garden roses till around the beginning of the sixties (1960) the demand for new cut rose varieties became stronger and stronger.

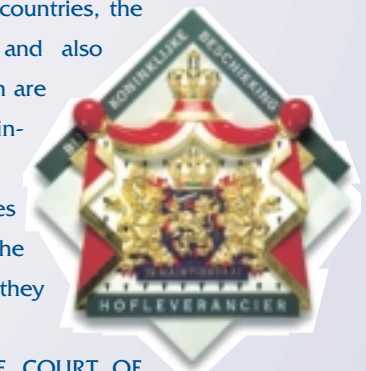

Again, it was Jan Spek Rozen who was one of the first to built a greenhouse in order to test these special type of roses. The varieties from Jackson and Perkins brought the first success. Jan Spek Rozen was the first to introduce these varieties like Zorina, Junior Miss, Golden Garnet, Sonora, Coral Princess and many others.

Thought this success other breeders wanted to have there varieties tested and represented by Jan Spek Rozen ofwhich one of the most wellkown nowadays is Kordes from Germany. This "marriage" started in 1968 and started the success story of the Kordes cut rose varieties. After a very successful period for both companies with the introduction of many world wide known roses, the cooperation ended in 2000 when both companies decided to move on on with there own varieties.

In The Netherlands the rose variety of Jan Spek "Happy Hour" has reached the top 5 in flower sales at the auction VBA. N-Joy is coming up quickly to the top as well. Of course our roses are tested in those area in the world where the conditions (climate, labour-costs) are much better then in Northern Europe, like in the East-African countries, the South America countries and also Asia, South-Korea and Japan are the Jan Spek varieties beginning to be popular.

In 1990 Jan Spek Roses was highly awarded by the Queen of the Netherlands: they became the Royal title:

BY APPOINTMENT TO THE COURT OF THE NETHERLANDS.
